SLITTING SAWS WITH SIDE CHIP CLEARANCE HIGH SPEED STEEL

This type of saw is similar to a thin side milling cutter, especially designed for slotting and particularly well adapted for deep cuts in steel. For wider cuts we recommend a staggered tooth saw.

SLITTING SAW WITH STAGGERED TEETH HIGH SPEED STEEL

This type of saw resembles a staggered tooth side milling cutter. It is a fast, easy cutting saw due to the alternate helical tooth form which provides a shearing action and plenty of chip space between the side teeth. It is made specifically for deeper cuts and coarser feeds.

COATINGS AVAILABLE ON EVERY TOOL ** See Page 161 for details

SLITTING SAWS WITH STAGGERED TEETH M42 COBALT

Cobalt staggered tooth saws with alternate helical teeth are manufactured for heavy duty cutting.

SLITTING SAWS WITH SIDE CHIP CLEARANCE M42 COBALT

Cobalt slitting saws with straight side teeth are for finer finishing & longer life. They are manufactured to make deep slotting cuts in harder machining materials.
