

New Qwik-Adjust Adjustable Arbor

2 piece design in both CAT-40 and CAT-50 styles.

4 radial and 4 axial adjusting screws, allowing any spindle misalignment to be easily corrected.

For use with Ingersoll Qwik-Ream/Unidex tooling or any tools requiring the closest spindle-to-workpiece orientation.

- Increased tool life
- Improved surface finish
- Can be adjusted on machine with coaxial indicator
- Coolant thru design
